REPLY BRIEF FOR APPLICANT

Sir:

This is in response to the examiner's answer.

Examiner questioned the claims under section 35 U.S.C §112. The examiner states that none of the amounts are provided for the ingredients of the milk protein concentrate. Claim 1 states that the protein content of the concentrate is between 65% and 90% of the composition, and that the probiotic bacteria, which is identified in claim 2, is in the amounts specified. Then, the user consumes 1.5 grams to approximately 4.0 grams of the protein per kilogram of body weight. These can all be fairly accurately determined, for the concentrate. Thus, it is believed that there is sufficient data provided in the claims, and which finds support in the specification, for determining the amounts of the ingredients for the concentrate.

Respectfully submitted,

Paul M. Denk  
Attorney for Applicant
